

ISO 27001 ENLIGHTENMENT WORKSHOP

SERVICE DESCRIPTION

When setting up and operating an information security management system, practical questions often arise right at the beginning, which can be solved much faster with expert help than by tedious research on the Internet. Our ISO 27001 Enlightenment Workshops introduce the implementation based on the concrete situation of your company and are the perfect complement to Instant 27001, the pragmatic documentation system for information security management systems based on ISO 27001.

Scope of service at a glance:

- One-day¹ interactive online workshop with focus on the specific needs of your organization
- Possible content:
 - *ISO 27001 introduction and first steps with Instant 27001²*
 - *Discussion of a possible scope for the ISMS*
 - *ISO 27001 walkthrough and review of selected existing controls in comparison with the standard requirements*
- Concrete recommendations for action based on the current information security status of your organization

Your benefits:

- Take the first steps in setting up your information security management system together with an ISO 27001 certified expert from TEN Information Management
- Document and record concrete contents directly in the Instant 27001 documentation system²
- First-hand tips and tricks on the approach and best practices for implementing ISO 27001

Your contributions:

- Staffing of the workshop with qualified contact persons for information security
- Provision of any existing documents (e.g. policies, procedures, risks)

¹If required and depending on the ISMS scope also longer

²If licensed and available by the customer
